LIGHTENING LOADS

aluminium skate & track datasheet

an introduction

LIGHTWEIGHT

Joloda Hydraroll's new Aluminium Skate weighs only 7kg each, making it undeniably a lightweight system. It weighs 5kg lighter than the typical steel skate-type. Our lightweight skates help operators manoeuvre the skate (and the load) on and off trucks lighter, reducing the strain on the operator.

HEAVY DUTY

Our new Aluminium Skates have been rigorously tested and confirmed as a 'heavy-duty' skate and are capable of lifting capacity of 1,600kg per pair - setting the new market standard. They also feature the same rollers that are used in our Steel Skates and have a larger load rating than competitors'.

EASY TO REPAIR

Our Aluminium Skates have been designed for easy and quick maintenance with a simple parts replacement process, which means that should any screws come loose, easy in-house maintenance can be carried out to prolong the skate's life.

Manufactured in
GREAT BRITAIN

MADE IN BRITAIN

Our new Aluminium Skates are manufactured in our in-house manufacturing facility based in Liverpool, United Kingdom, which has been manufacturing the world-renowned Joloda skate for 60 years.

sizes and dimensions

Item	Quantity
Rollers 9	9
Bogeys 1	1
Lowered Height (mm) 31	31mm
Lift Height (mm) 17	17mm
Weight (kg) 7.00	7.0kg
Lift Rating Per Pair (kg) 1,600	1,600kg
Raised Handle Angle 40°	40°

pack contains

- 2 x aluminium skates
- 2 x operating handles
